

SYMBOLISM

~~~

A language of the eternal mind.

~~~

The prolonged consideration of symbolism mutates and expands the facilities of my mind. Like the mind of the artist, it facilitates growth within the sacred chapters of the spirit, art is a ceremony of the dominance of my own spirit conceiving work about the fertility of commencement- as capturing as an eternal bud.

The Love I have for my work profoundly binds me to the eternal mind, expressing and chronicling my love affair through the manifestation of my being.

Art manufactures the barer of annotation, the manuscripts of my being. Thus, I collect and ponder the duplications of the spirit. This heavenly spirit directs its prolonged time within the sacred, increasing the mass of my consciousness. My mind sustains my work within a lingering exemplary procession of the eternal mind.
